

## **Dengue awareness program**

Dengue fever is caused by a virus which is transmitted by an infected Aedes mosquito - Aedes aegypti and Aedes albopictus. Mosquitoes become infected when they bite infected humans, and later transmit infection to other people they bite. The disease usually is self-limiting but in some people can present with life-threatening complications such as Dengue Haemorrhagic Fever and Dengue Shock Syndrome.

Dr. Sasikumar the Director of Global Institutions gave Dengue awareness speech in schools in Erode . The students of Global institution offered “Nilavembu “ drink to prevent Dengue.
