

Statistics of Health care sector in India

Speaker : Mr Ramamoorthi Sundaram , CEO -R.G.S VET NUTRACETICALS COY

Mr Ramamoorthi Sundaram, CEO -R.G.S VET NUTRACETICALS COY , gave a marvelous speech on the statistics of Health care sector in India, during the inaugural function of Global institutions 2019 - 2020 batch. He stated how the paramedical and medical field is evolving.

“This field was referred as Health service Sector during 2001 budget. From 2005 its being referred as Health service industry. From the year 2013 , the revenue from GDP growth, 486 Lakh crore rupee was being spend on health sector. Now it is being increased by more than 60 lakh crore rupee. The health sector industry is growing drastically.

According to the study ,Top 5 health issues India is yet to face are,

IVF

Diabetics

Cardiac

Cancer

Lung diseases

Due to the usage of cellphones, Number of optical shops are growing which will increase the hearing aid industry also. By 2020 the food industry will grow faster by 22% simultaneously Health Industries growth will be 17% .Health care industry is in the 4'th place in Employment sector. The paramedical is a futuristic course.In the year2025 , 4 crore healthcare personals will be required as health tourism is evolving. Health care personnel have to be linguistic for a better communication. Indian government has planned for 30 Lakhs bed additional hospital facility . Future requirement for Doctors are 15,40,000 for which 1.20 crore nurses and paramedicals are required. ITC is planning for 3000 bedded hospitals and many MNC's are planning to come in to healthcare sector as well. This is a very potential field in which healthcare personals has to be aware of all latest updates. “ it was a very valuable speech sir. Thank you so much.
